

## AAPI in Geosciences: Inclusivity, Leadership, and Experience (AGILE)

***Are you a STEM (science, technology, engineering, and math) major interested in doing research that applies your knowledge to Earth, planetary and environmental problems?***

The **AGILE (AAPI in Geoscience: Inclusivity, Leadership, and Experience) Research Internship program** is open to all undergraduate students who would like to **gain research experience in the geosciences** (including the Earth, ocean, atmospheric, climate, environmental and planetary sciences). Applicants who can articulate their personal or professional experiences supporting **Asian Americans and Pacific Islanders (AAPI) communities (including perspectives of those with multi-racial heritage)** are especially encouraged. **No previous research experience or knowledge of the geosciences is required!** Awardees will receive up to \$10,000, including a stipend.

*“Having the opportunity to explore a field with people of similar identities and experiences as me is something that I have been searching for. AGILE not only provides me with the ability to perform meaningful work within the geosciences but also creates a strong community between other AAPI students and mentors.” - Summer 2021 intern Casey Vigilia*

**Deadline to apply:** February 1, 2023
